

Plastic Dumpsters

HYBRID CONTAINERS

Bearicuda offers a full line of leading edge rotationally molded refuse solutions for all demanding haulers.

From innovative commercial front, rear and side load containers. Get more maintenance free life out of your container.

- Supreme plastic quality and design with steel reinforcements highlight the Hybrid nature of our dumpsters. This results in die-hard product life.
- Low maintenance, 30% lighter than metal, no painting, no weld repairs and dent resistant. Graffiti can be wiped off with lacquer thinner.
- Body will not corrode. Ideal for food waste programs and humid climates. Smooth interior will not hold waste or odors.
- Quiet - substantially quieter than comparable steel containers making them great for noise sensitive areas.
- Molded with thicker plastic in key structural areas and powder - coated steel reinforcement in high stress sections.

HYBRID FRONT LOAD: 2YD-8YD

► Features

Universal Lid Bar Design accommodates industry standard lids and keeps lids straight

Powder coated steel resists rust

Lid opens 270° against back of container

Ribbed sides and bottom designed for added strength

Pockets are mounted to molded undercuts and wall, distributing the load across container

Available with or without casters. Quick release pad design makes changing in the field easy

UV resistant for long term exposure to sun light

Our lip design replicates a metal tubing lip, creating a ridged dumpster

Channel hinge design reinforces container, keeps lids straight and allows lids to hang freely

1" drain standard for easy cleaning and draining

Steel caster plates running the depth of the body prevent puncturing and provide added strength

Hybrids are easier to move for drivers, lessening injuries in enclosures

Compatible with fully automated front load collection systems

1/4" solid front plate wraps around all front loads for added protection during fork entry

Containers are nestable allowing for high shipping densities

HYBRID FRONT LOAD: 2, 3, 4 CUBIC YARD

CART152

CART153

Measurements reflect dimensions of fully assembled dumpsters with casters

► Container Specifications

MODEL	WIDTH	DEPTH	HEIGHT	LOAD RATING
2 YARD FL	80"	41"	55"	1000 LBS.
3 YARD FL	80"	49"	64"	1500 LBS.
4 YARD FL	80"	59"	70"	2500 LBS.

Container specifications vary slightly based on product mold.

► Shipping Information

MODEL	ASSEMBLY WEIGHT	STACK HEIGHT	T/L QTY (53' TRUCK)	T/L QTY (53' FLATBED)
2 YARD FL	270 LBS.	3 OR 4* HIGH	45	60*
3 YARD FL	365 LBS.	3 HIGH	45	45
4 YARD FL	445 LBS.	2 OR 3 HIGH	20	30*

*Casters on bottom dumpster removed to achieve a stack 4 high.

Our Hybrids can maximize freight efficiencies. For example 20 4yds and 10 2yds fit together in one truck.

HYBRID FRONT LOAD: 6 & 8 CUBIC YARD

CART155

6 YARD FL SLANT TOP

CART156

8 YARD FL FLAT TOP

CART157

8 YARD FL SLANT TOP

6 & 8 yds have steel supports on the side and bottom for added strength when lifting heavy loads like organic waste

► Container Specifications

MODEL	WIDTH	DEPTH	HEIGHT	LOAD RATING
6 YARD FL FLAT TOP	80"	78"	64"	3500 LBS.
6 YARD FL SLANT TOP	80"	78"	64"	3500 LBS.
8 YARD FL FLAT TOP	80"	78"	82"	5000 LBS
8 YARD FL SLANT TOP	80"	78"	82"	5000 LBS

Container specifications vary slightly based on product mold.

► Shipping Information

MODEL	ASSEMBLY WEIGHT	STACK HEIGHT	T/L QTY (53' TRUCK)	T/L QTY (53' FLATBED)
6 YARD FL FLAT TOP	580 LBS.	2 HIGH	16	16
6 YARD FL SLANT TOP	580 LBS.	2 HIGH	16	16
8 YARD FL FLAT TOP	640 LBS.	1 HIGH	8	8
8 YARD FL SLANT TOP	640 LBS.	2 HIGH	14	14

HYBRID REAR LOAD: 2 & 3 CUBIC YARD

► Features

Universal lid bar allows for industry standard lids

Steel lid bar keeps lids straight

2 YARD RL

Reinforced kick plates and cable assembly underneath for added life and strength

Powder coated steel reinforcements

Quick release caster pad design for efficient change out

Trunnion Bar fits perfectly into molded lip. It's bolted on and further reinforced with steel corner and side lip handles

Cable guide prevents cable from bending lid rod

Steel reinforcements highlight the Hybrid nature of our dumpsters. This results in a dumpster built for the rigors of hauling

Designed for strength while maximizing shipping. Ship 4 on a pallet or up to 80 with casters on a 53ft van truck

► Container Specifications

MODEL	WIDTH	DEPTH	HEIGHT	LOAD RATING
2 YARD RL	78"	44"	51"	1000 LBS.
3 YARD RL	78"	50"	67"	1500 LBS.

Container specifications vary slightly based on product mold.

► Shipping Information

MODEL	ASSEMBLY WEIGHT	STACK HEIGHT	T/L QTY (53' TRUCK)	LTL STACKING AND LTL MAX. QTY
2 YARD RL	300 LBS.	4-5 HIGH	80	4 PER PALLET
3 YARD RL	380 LBS.	2 HIGH*	34*	2 PER PALLET*

*some assembly required.

HYBRID OPTIONS

► Available Colors

Hybrid Dumpsters available in 9 standard colors. Lids are black and complement all container colors.

Colors as shown in this document may differ slightly from the actual product.

Custom colors available upon request.

► Post Mold Options

- Place company logo here with a custom in-mold plate or post mold graphic

- In-mold plate area is 9.25" w x 5.25" h

► Trainable & Bottom Pocket Options

- Trainable bar connects to spring-loaded hitch, securely attaching containers for smooth towing
- Universal Trainable and bottom pockets available on all 2yd, 3yd and 4yd sizes

► Casters, Windows & Recycling Slot

- Standard 6" rubber on steel casters available
- Heavy Duty 8" casters available for trainable applications
- Neoprene washers used to seal bolted caster plates to prevent container leaking
- 28x24" sliding windows available on 8YD Flat
- 20x18" sliding windows available on 8YD Slant
- 6x57" Recycling Slot available on all dumpsters.

► Lid Lock Bar and Locking Chain

- Manual lock bar fits all our front loads. Locking chain option available for our rear load, compactor and side loads
